Why demos look
the way they look?

Commercial
computer graphics
have matured

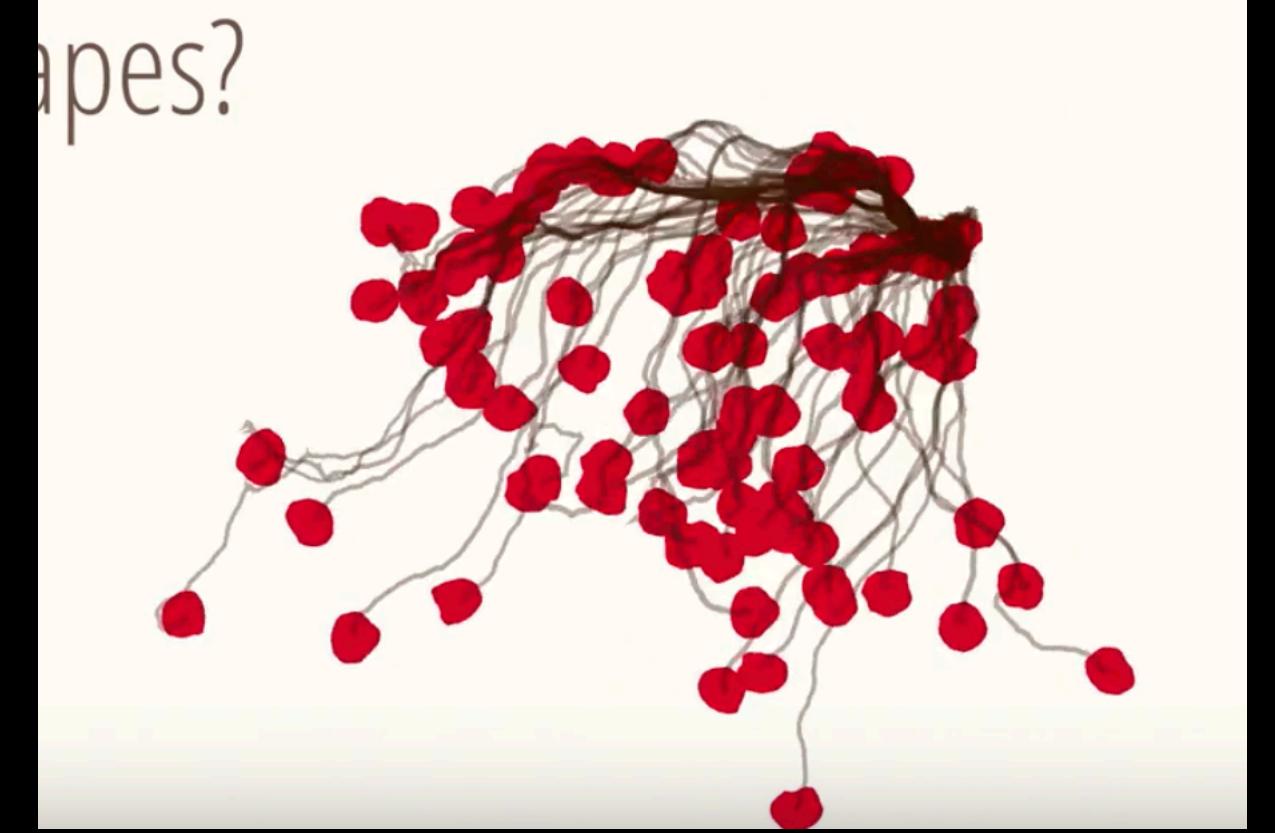

Is demoscene DOOMED ?

For me:
demos = audiovisual code art

How to visual art???

1 - Don't reinvent the wheel

Don't reinvent the wheel

pinterest.com/felixbade/demo-inspiration

[pinterest.com/felixbade/
g18-ydinefekti](https://pinterest.com/felixbade/g18-ydinefekti)

Search from youtube/google:

assembly demo compo,
revision,
4k intro,
media art,
etc.

2 - Fonts

but perhaps not all of them

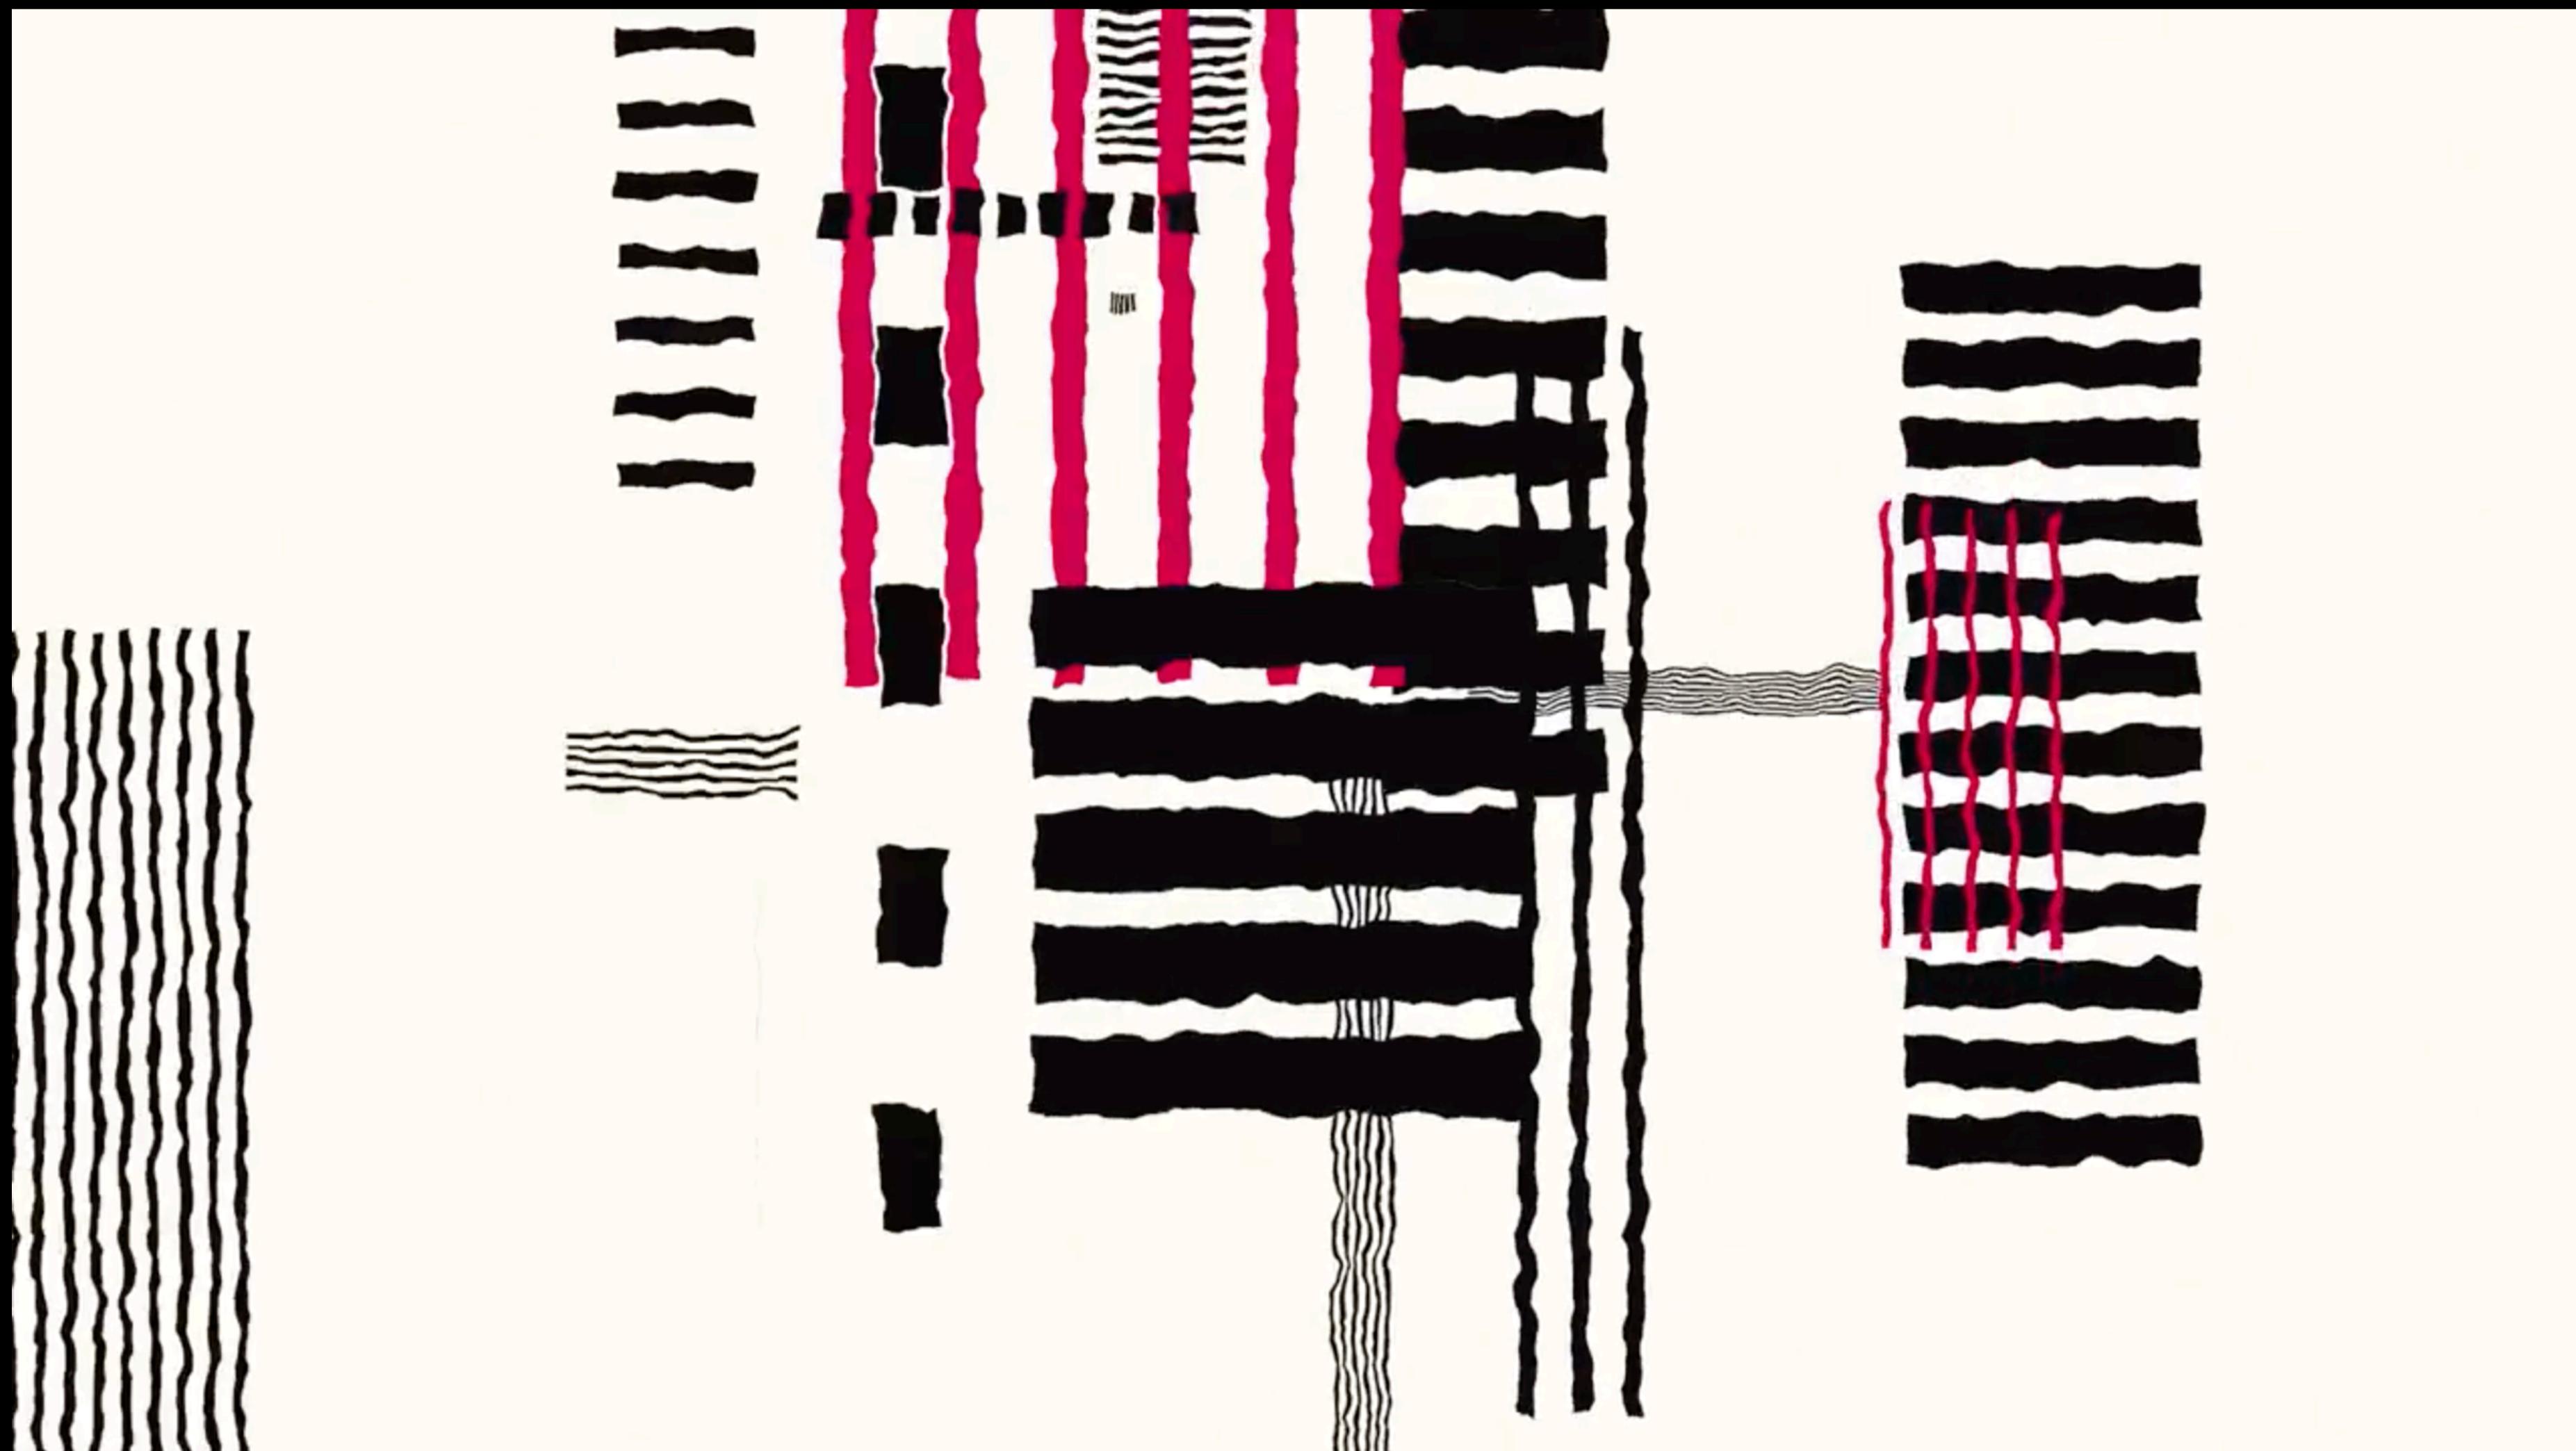

example 05 typography

3 – Colors

but perhaps not all of them

example 04 colors / hue_wheel

4 – Parametric variation

example 07 palldemo
+ controller

example 03 rotating bars

example 08 vuori
+ controller

5 – Music sync

demo 06 noise

6 Tips for teamwork

Communicate

Communicate

Communicate

Delegate

Delegate

Delegate

Also, get inspiration from
the Processing reference

One more thing!

Make your demos
resolution independent

You'll thank me on Sunday :)

Have fun!
